Find Content

Last Modified on 08/25/2023 1:18 pm CDT

Access Content

• Click on the [Content] link in the [Navbar].

Content Grades Course Activities - Collaboration - Support

Browse Content

- 1. Click on [Table of Contents] to see all content items.
- 2. Click on a [module] to see the content items within the module.

View Files

- When viewing files (such as PDFs, Word Documents, PowerPoints, etc.), you can choose to [View as Text] or [View as Page]. Viewing as page will attempt to display the original document as it is, while viewing as text will display the text of the page only.
 - Viewing as page generally works best for PowerPoints and PDFs, while viewing as text may sometimes be necessary for Word documents or other files which have images or other content that D2L is having difficulty displaying. If neither option is working well for a particular file in Content, you may need to **Download** (https://vlac.lonestar.edu/help/downloadcontent) the file.

Content Grades	Course Activi	ities 🗸	Collaboration \sim	VTAC Support				
Week 1 > Coffee 101 Lesson 1								
Lesson 1	~					۵	23	< >
