

# Increase Readability Using Your Account Settings

Last Modified on 08/25/2023 11:36 am CDT

You can increase the readability of D2L pages and tools by modifying your Account Settings. Changing your account settings allows you to customize many of your viewing options within D2L.

1. Click on your name in the Minibar.
2. Choose **Account Settings**.
3. Under Font Settings, choose the font and size that you prefer.

The screenshot displays the 'Account Settings' page with tabs for 'Account Settings', 'Discussions', 'Email', and 'Metadata'. The 'Pronouns' section is visible, with options to 'Allow others to see my pronouns' and 'Use what my organization has on record: None'. Below this is a text input field for 'Use different pronouns:' and a note about common pronouns. The 'Font Settings' section is highlighted with a red box, showing a 'Font Size' dropdown menu with options: 'Medium' (selected), 'Small', 'Medium', 'Large', and 'Huge'. A preview of the text 'win fox jumps over the lazy dog.' is shown next to the dropdown. Below the preview, the word 'Content' is visible, followed by a note about marking content as read.
